

zero data entry maps

one-click access to
maps & directions

As an eCode member, if you view another member's WEB Card, the system will automatically recognize your address and display the directions from your location to your friend's, with just one click. No data entry required! Additionally, you can include custom driving directions to your place of work or residence on your WEB Card. The click of a button displays an up-to-date map and point-to-point driving directions.

personalized url

no web site needed !

You get your own FREE URL with your eCode registration. The simplest ever, such as JDoe.eCode.com. It already has your WEB Card, Guest Book, and Counter. You can create interactive opinion polls for visitors to your URL, and even share important dates! All of the information displayed on your personalized URL may be updated as frequently as you wish. You may customize your page in a variety of ways!

self-updating guest book

get feedback
from your visitors

Your personalized URL already contains a Guest Book, which others may sign and leave comments in. But, it gets better... If you'd like to add a Guest Book to your Web site, here's one that requires ZERO programming.

WEB Card in email

make an impression !!!

Enhance your email by including your WEB Card in your email signature, and add a unique touch to all of your business and personal communications. Everyone you email will have your most current contact information, and you get to make your email messages stand out!

WEB Card on web site

let your web site
stand out !

Showcase your virtual business card on your Web site and offer your visitors clearly identifiable contact information. Your active WEB Card contains links to your email address and Homepage, and site visitors may also click on the appropriate areas of your card to access your personalized URL and Guest Book.

custom logos

even more individuality
for your WEB Card

Members have the ability to upload their custom logos to the eCode.com Web site and incorporate a personal logo on their WEB Cards. Whether your logo is a company logo or a special symbol, eCode.com lets you customize!
